- Project design appraisals and coordination
- Design development and management
- Construction Management
- Project Health, Safety and Environmental Management
- Design coordination
- Tender document compilation and evaluation
- Coordination of consultants

CAPABILITIES

- Design coordination and management
- Project planning and monitoring
- Project costing and construction cost management
- Managing projects with varying facets and complexities
- Development of design and construction risk assessments
- Specifying project electrical requirements
- Tender evaluation

PROJECTS' PROFILE

Project Name: Upgrading of Engine Room 2 & 3

Year: 2012

Location: Three Rivers, Republic of South Africa

Client: Zuikerbosch Pumping Station – Rand Water

Main Project Features: Feasibility studies, Project proposal, Tender document compilation, Tender evaluation and appointments, managing designs and electrical Installations, Managing Factory Acceptance Tests, Site Acceptance Tests and commissioning, Project close-out and handover.

Position Held: Project Manager/Electrical Technologist

Activities Performed: Project Management, Electrical Engineering services, Site construction management

Project Name: Upgrading of Filter House 1 at Vereeniging Pumping Station

Year: 2009/2010

Location: Johannesburg, Republic of South Africa

Client: Vereeniging Pumping Station – Rand Water

Main Project Features: Electrical scope proposal, Tender document compilation, Tender evaluation and appointments, managing designs and electrical Installations, Managing Factory Acceptance Tests, Site Acceptance Tests and commissioning, Project close-out and handover.

Position Held: Project Manager/Electrical Technologist

Activities Performed: Project Management, Electrical Engineering services, Site construction management, Management feedback

Project Name: Installation of Electrical distribution boards at Zuikerbosch Pumping Station

Year: 2008

Location: Johannesburg, Republic of South Africa

Client: Zuikerbosch Pumping Station – Rand Water

Main Project Features: Electrical scope proposal, Tender document compilation, Tender evaluation and appointments, managing designs and electrical Installations, Managing Factory Acceptance Tests, Site Acceptance Tests and commissioning, Project close-out and handover.

Position Held: Project Manager/Electrical Technologist

Activities Performed: Project Management, Electrical Engineering services, Site construction management, Management feedback

Project Name: Upgrading of Steam Plant at Vereeniging Pumping Station

Year: 2009

Location: Johannesburg, Republic of South Africa

Client: Vereeniging Pumping Station – Rand Water

Main Project Features: Electrical scope proposal, Tender document compilation, Tender evaluation and appointments, managing designs and electrical Installations, Managing Factory Acceptance Tests, Site Acceptance Tests and commissioning, Project close-out and handover.

Position Held: Project Manager/Electrical Technologist

Activities Performed: Project Management, Electrical Engineering services, Site construction management, Management feedback

Project Name: Upgrading of Lethabo Intake Station

Year: 2014/2015

Location: Johannesburg, Republic of South Africa

Client: Vereeniging Pumping Station – Rand Water

Main Project Features: Electrical scope proposal, Tender document compilation, Tender evaluation and appointments, managing designs and electrical Installations, Managing Factory Acceptance Tests, Site Acceptance Tests and commissioning, Project close-out and handover.

Position Held: Project Manager

Activities Performed: Project site management, commercial oversight and development of design appraisal and design co-ordination

Project Name: Winter load recordings

Year: 2002-2004

Location: Johannesburg, Republic of South Africa

Client: Eskom

Main Project Features: Installation of load recorders, retrieval of data, presentation of load profiles and information

Position Held: Engineering Technician

Activities Performed: Project site management, commercial oversight and development of design appraisal and design co-ordination

Project Name: Panel audits for Driefontein Mines

Year: 2003

Location: Johannesburg, Republic of South Africa

Client: Driefontein Mines

Main Project Features: Testing of electrical panels, routine maintenance tests above and underground

Position Held: Engineering Technician

Activities Performed: Project site management, commercial oversight, management feedback
